Smooth Out the Lines of Time

Sublative enables you to achieve a more youthful appearance.

This technology has been shown to effectively treat mild to moderate wrinkles and textural irregularities. This is truly the next generation of safe and effective rejuvenation technology.

Look as young as you feel.

Energy is applied to the skin in a matrix. The healthy skin around the spots accelerates the healing process.

Skin after Sublative.

How does Sublative work?

RF energy is precisely directed into the skin in the form of a matrix. Healthy skin around the dots accelerates the healing process of the skin. Post treatment, new collagen and healthy skin cells are produced. Mild to moderate wrinkles and superficial imperfections of your skin's tone and texture are reduced.

Is Sublative right for me?

Treatment is a safe and effective solution for most skin types.

When can I expect to see results?

Typical treatment protocol is 3 treatments, 4-6 weeks apart. The total number of required treatment sessions depends on your skin's condition.

Does it hurt?

During treatment, many patients feel a warm, prickly sensation as energy enters their skin. After treatment a pink or red "sunburn" appearance is also common. Topical anesthetic ointments and cooling are used to reduce unpleasant feelings during treatment.

Are Sublative treatments covered by insurance?

Most insurance companies do not offer reimbursement for cosmetic and aesthetic procedures. Please consult your insurance carrier for more details.
